### DETAILED ACTION

Due to the complex nature of the claims, no request for oral election is being made. Please see MPEP 812.01.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claims 1-14, drawn to a method of manufacturing 2,5-dihydroxybenzenesulfonic acid or any of its pharmaceutically acceptable salts.

Group II, claims 1-14, drawn to a method of treatment comprising 2,5-dihydroxybenzenesulfonic acid or any of its pharmaceutically acceptable salts.

Group III, claims 1-14, drawn to a process of preparing 2,5-dihydroxybenzenesulfonic acid or any of its pharmaceutically acceptable salts.

Group IV, claims 1-14, drawn to a composition, comprising 2,5-dihydroxybenzenesulfonic acid or any of its pharmaceutically acceptable salts.

*Note: Claims 1-14 are improper claims encompassing the use of 2,5-dihydroxybenzenesulfonic acid. Amendment is required to correct their form to comply with US practice. These claims can be interpreted as a method of treatment, method of manufacturing, process of preparing or a composition. Therefore they have been placed Group I-IV for the purpose of this Lack of Unity requirement.*

The inventions listed as Group I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: 2,5-dihydroxybenzenesulfonic acid is not novel (see U.S. 3,954,767, abstract). Therefore a holding of lack of unity of invention against Groups I-IV is proper.

### **Rejoinder Notice**

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

### **Inventorship Notice**

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of

Art Unit: 1614

inventorship must be accompanied by a request under 37 C.F.R. 1.48(b) and by the fee required under 37 CFR 1.17(i).
